If you missed it this is the sticker on @elonmusk's gaming laptop. Yes that's a dog on a dollar bill.

How much is that Doge in the window?

After watching @stevenmarkryan's video yesterday I think it's plausible Elon has a large Doge holding. With major skin in the game, it doesn't look like this will stop any time soon since without Elon I think Doge goes back to \$0.01.

To clarify, I don't think Elon would ever sell any his Doge holdings. He's the ultimate hodler.
